ARDEX EG 8

Cement/Epoxy Hybrid Grout and Adhesive

ARDEX EG 8 combines the chemical resistance of an epoxy-based grout with the ease of application associated with cement based grouts

ARDEX EG 8 is a cement/epoxy hybrid grout and adhesive with excellent resistance to most chemicals but, unlike traditional epoxy grouts, ARDEX EG 8 is easy to apply, requires no special tools, and can be cleaned off the tile surface up to 45 minutes after application.

ARDEX EG 8 has been formulated to resist chemical attack and to provide a durable, abrasion resistant waterproof finish that is hygienic and impervious, making it ideal for use in:

- **Swimming Pools**
- **Hydrotherapy and spa baths**
- **Domestic and commercial food preparation areas where chemical resistance and hygienic joints are required**
- **Hospitals**
- **Bathrooms & showers**

Once hardened, **ARDEX EG 8** can withstand full loads after 2 days curing, and after 7 days is resistant to aqueous salt solutions, chlorine water, commercial cleaning agents, alkalis and a wide range of dilute mineral acids.

ARDEX EG 8 can also be used as a floor tile adhesive or a mosaic wall tile adhesive in areas where a chemically resistant adhesive bed is required.

ARDEX EG 8

Cement/Epoxy Hybrid Grout and Adhesive

EASY APPLICATION

Colours available:	Grey and white
Joint width:	2-12mm
Workable	45 minutes
External use:	Yes
Pack size:	4kg
Coverage	Refer to datasheet
Underfloor heating:	Yes
Storage:	12 months in original unopened containers

Application

Tools required

Apply ARDEX EG 8 with a standard squeegee

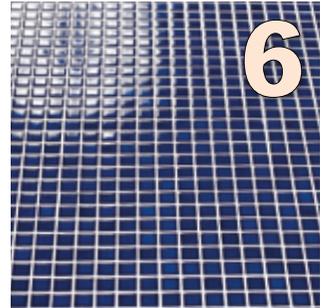

Remove excess ARDEX EG 8 from the surface

Emulsify ARDEX EG 8 residue with an ARDEX sponge and water

Clean down the tile surface, to remove emulsified residues

Finished application

ARDEX EG 8

Cement/Epoxy Hybrid Grout and Adhesive
