panDOMO®
SUSTAINABLE

ARDEX panDOMO® and Sustainability

ARDEX PANDOMO® ensures the use of a sustainable application by using environmentally friendly techniques and products. These measures have an impact on preservation of energy, the environment, health and resources and ensures the well-being of the users.

For some time, buildings have been assessed and rated for their sustainability by the LEED® (Leadership in Energy & Environmental Design) rating system. This system considers not only ecological and economic points of views but also the technical and social quality of buildings as a whole.

ARDEX PANDOMO floors are ideal for use with radiant flooring systems to provide more comfort at lower temperatures reducing energy usage and the amount of forced air particles and allergens in the air. ARDEX PANDOMO floors are made of sustainable materials that are beautiful and environmentally friendly.

ARDEX PANDOMO ...*limited only by your imagination.*

Floor

ARDEX PANDOMO® Floor fulfills the highest requirements of style, uniqueness and long-term endurance. The concrete feel and appeal delivers a quality appearance in commercial areas with increasing popularity in residential environments as well.

FloorPlus

ARDEX PANDOMO® FloorPlus is the perfect choice for those who want a cementitious floor with a durable, tough surface. By floating high-quality, specially selected aggregate (PANDOMO® HG) into the fresh mortar, the surface becomes much harder and the aggregate increases the abrasion resistance.

Loft

ARDEX PANDOMO® Loft is the latest development of the well-established PANDOMO® line and was created because of its solid and extremely durable structure for floors in public and commercial areas. PANDOMO® Loft has been installed in office, retail and residential environments because of its unique texture and consistency that allows for an almost infinite range of texturing and color.

Wall

ARDEX PANDOMO® Wall creates new worlds using unique colors and texture. The cement-based material has excellent bonding properties and can be used to resurface walls and ceilings. The material is easy to maintain and offers a durable long-lasting surface. The walls and ceilings can be individually styled in collaboration with expert craftsmen.

Terrazzo Systems

ARDEX PANDOMO® Terrazzo systems are a perfect choice for mineral decorative flooring. All three systems are cementitious based which provides an environmentally suitable alternative to standard terrazzo floor systems. Various color options and aggregates allow you to create a unique flooring system that will add character and charm to your project.

ARDEX PANDOMO® TerrazzoBasic is a fast, economical and creative system which uses local additives to create a distinctive and durable design. PANDOMO® TerrazzoMicro is a finer variant of traditional terrazzo. With the use of smaller aggregates, it creates a more homogenous and subtle aesthetic. PANDOMO® TerrazzoPlus provides an extremely durable and long-lasting floor. Its rapid workability and early strength makes this system ideal for high traffic areas.
